Karachi, Pakistan

## EXPERIENCE

### Full Stack Developer (MERN)

#### Salsoft Technologies

07/2019 - Ongoing Karachi, Pakistan

Salsoft technologies is an organization growing at a rapid pace, with development in every field such as Graphics, Web Development, AI, Blockchain, AR/VR etc.

Responsibilities:

- Working as a full stack developer in the web application department.
- Build front-end logic for web applications with all logic handling, using best practices and libraries such as Redux, React Router, Formik etc.
- Also responsible to research and present innovative ideas to optimize the performance of existing applications, by reducing load times using technologies such as sockets.
- Being full stack, I also develop backend APIs using cutting-edge NodeJS frameworks such as NestJS, HapiJS and FeathersJS with MySQL as the database language.
- Deploy applications to web server using client-side rendering and server-side rendering as needed.

### Front End Developer

#### Xord.One

02/2019 - 06/2019 Karachi, Sindh

Xord.One is a blockchain-based startup, aiming to apply blockchain to daily problems and come up with unique and reliable solutions.

- I worked as the front end developer responsible to handle client side logic of various applications.
- Used latest libraries such as React and Redux to ensure fast and reliable performance.
- Hands-on experience with state-of-the-art portal dashboards such as Ant Design Pro.
